

TimetoPay (Receipt Tracker) — Marketing Copy & Taglines

A single home for all the blurbs, taglines, and marketing copy — both what's currently live in the app/deck and fresh options to pick from.

+P Logo tagline (short — for the lockup under "TimetoPay")

Use one short line directly beneath the logo. Recommended (the "worth keeping the receipt" angle):

Finally, a reason to keep the receipt.

Ultra-short (1–3 words, best for a tight logo lockup):

- Keep the receipt.
- Worth the receipt.
- Save the receipt.
- Receipts worth keeping.
- Yes to receipts.
- Receipts pay off.

Other short options in the same vein (playful — paper receipts are worth it now):

- Say yes to paper receipts.
- The reason you save receipts.
- It's worth the paper receipt.
- Don't toss that receipt.
- Every receipt is worth keeping.
- Now your receipts pay you back.
- Keep the receipt. Keep the savings.
- Paper receipts, finally worth it.
- Save the receipt, save the money.

If you'd rather a benefit-first line instead of the receipt angle:

- Scan smarter. Spend less.
- Receipts != real savings.
- Snap. Track. Save.

1. Currently live copy

Pulled directly from `artifacts/receipt-tracker/app/landing.tsx` — the actual public homepage, not a paraphrase of it.

Landing page

- **Eyebrow badge:** Keep the Receipt

Hero headline:

Make smarter grocery decisions — from your own receipts

- **Hero subtitle:** Scan your receipts and TimetoPay turns them into your own price history — so every shopping decision is based on what you've actually paid, at the stores you actually shop. No guesswork, just your real experience.
- **Primary CTA:** Get started — it's free

Feature blurbs

- **Scan with AI** — Snap a photo of any receipt and AI pulls out every item, price, and store in seconds — no typing.
- **Track prices over time** — See how grocery prices move week to week, and which store gives you the best deal on the things you buy.
- **Smart shopping list** — Your regulars are detected automatically and grouped by store, with the lowest known price next to each item.
- **Spending insights** — Weekly spend trends with high and low flags, plus full price history for every item you've ever bought.

How it works: Scan your receipt !' We do the rest !' Shop smarter

SEO / social meta

- **Title:** TimetoPay — Scan receipts, track prices, smart shopping list
- **Description:** TimetoPay scans your receipts with AI, tracks grocery prices over time, and builds a smart shopping list.

& p The live template at `artifacts/receipt-tracker/server/templates/landing-page.html` currently appends "Get it on iOS and Android with Expo Go" to this description — Expo Go is a development tool, not how anyone actually installs the app. Worth fixing in the template itself; not changed here since that's markup, not copy.

Pitch deck taglines

- **Cover:** Scan smarter. Spend less.
- **Problem:** Prices creep up. Receipts pile up. Nobody's keeping track.
- **Solution:** Scan it. AI does the rest.
- **Price history:** Track every price over time.
- **Shopping list:** A shopping list that builds itself.
- **Catalog:** Real prices from real shoppers.
- **Support:** Help keep it growing.

2. Fresh tagline options (new — pick your favorites)

Punchy one-liners

- Turn receipts into savings.
- Stop overpaying for groceries.
- Your receipts, finally working for you.
- The cheapest store, every time.
- Never overpay at the checkout again.
- Grocery prices, decoded.

Save money on the stuff you already buy.

Benefit-led

- Scan a receipt, save on the next shop.
- Know the lowest price before you buy.
- AI reads your receipts so you don't have to.
- See where your grocery money really goes.
- Spot price hikes before they cost you.

Friendly / conversational

- Smarter shopping starts with a snap.
- Let your receipts do the math.
- Shop like you've memorized every price.
- The price memory your wallet wishes you had.

3. Longer blurbs (for app stores, social bios, etc.)

One sentence (bio length):

TimetoPay scans your grocery receipts with AI, tracks how prices change over time, and builds a smart shopping list that points you to the cheapest store.

Short paragraph (app store / about):

TimetoPay turns the receipts you'd normally throw away into real savings. Snap a photo and AI instantly pulls out every item, price, and store — no typing. As you scan, TimetoPay tracks how prices move over time, flags your high and low spending weeks, and builds a shopping list of your regulars with the lowest known price and best store for each. Shop smarter, spend less.

Elevator pitch (2 sentences):

Prices creep up and receipts pile up, but nobody's actually keeping track. TimetoPay does it for you — scan any receipt, and AI turns it into price history, spending insights, and a smart, store-by-store shopping list that always finds you the cheapest option.

4. Full feature list (benefit-led)

Drop-in copy for a landing page, app-store description, or pitch — grouped by the benefit each feature sells.

Scan smarter, type less

- **AI receipt scanning** — snap a photo and AI instantly pulls out every item, price, and store. No manual entry.
- **In-app camera** — capture a receipt without leaving TimetoPay to open Photos first.
- **Upload from your gallery** — already have a photo? Import it in a tap.
- **PDF receipt import** — forward an emailed or digital receipt (up to 10 pages) and let AI do the rest.
- **Share straight in** — send a receipt to TimetoPay from Photos or Files using your phone's share sheet.
- **Auto-categorized & labeled** — every item gets a category and emoji icon automatically, so your history is organized the moment it's scanned.

Never overpay again

- 📈 Automatic price tracking — watch how prices change over time, per item.
- 🏪 Best price & best store — instantly see where each item is cheapest based on your own buying history.
- 📋 Smart shopping list — builds itself from what you actually buy, split into Regulars (your staples) and One-offs.
- 🛒 Shopping Mode — a dedicated in-store view: your list grouped by store, big checkboxes, a running basket total.
- 🚫 Ran out, one tap — mark an item out of stock and it jumps back to the top of your list.
- 💰 Store cost-benefit analysis — factor in delivery fees and minimum-order thresholds to know which store really wins.
- 🗺️ Community price catalog — see typical prices shoppers near you pay, so you know a good deal when you see one (fully anonymized — we never show whose purchase is whose).

Stay organized effortlessly

- 📄 Printable & shareable lists — export a clean PDF grouped by store, category, or A–Z.
- 🔍 Search & sort everywhere — find any item, store, or receipt in seconds across every screen.
- ⚙️ Full control — edit item names, add notes, fix prices, or swap an item's icon anytime.

Know where your money goes

- 📊 Spending analytics — weekly spend at a glance with automatic HIGH/LOW flags when something's unusual.
- 📅 Per-item price history — lowest, average, and highest price for everything you buy.

A place to talk shop

- 🗨️ Community board — trade tips, deals, and recipes with other shoppers once you've uploaded a couple of receipts. Every post is reviewed before it's visible to anyone else.
- 🚫 Report and block — flag anything that shouldn't be there, or stop seeing a person entirely — instant, private, and reversible.

Private and built for trust

- 🔒 Your data is yours — every receipt, store, and price is private to your account by default.
- 🛡️ Privacy-first community pricing — aggregated insights without ever exposing an individual's purchases.

Use it anywhere

- 📱 Mobile + web — native iOS and Android apps plus a full web app in any browser, all on the same account.
- 💯 Completely free — every feature above, for every signed-in user. No subscription, no trial, no card required. Ever.

5. What signing up gets you

TimetoPay had a paid tier before 2.0 — a 30-day trial, then \$5.99/month via Stripe or PayPal. That's gone. As of the 2.0 release, every feature is free for every signed-in user, permanently. This section

replaces the old subscriber-facing pitch with copy for the same moment (right after sign-up, or on a "what you get" screen) that doesn't promise a bill that never comes.

Everything, from the moment you sign up:

- **Unlimited AI receipt scanning** — snap a photo and AI pulls out every item, price, and store. No typing, no limits, no meter running.
- **Every way to add a receipt** — in-app camera, gallery upload, PDF import, or share-to-app.
- **Full price history** — track how the prices of everything you buy move over time.
- **Best price & best store** — always know where each item is cheapest based on your own shopping.
- **Your self-building shopping list** — regulars and one-offs detected automatically, with the lowest price next to each item, plus a dedicated Shopping Mode for the store itself.
- **Store cost-benefit analysis** — weigh delivery fees and minimum orders to pick the smartest store.
- **Community price catalog & board** — see typical prices other shoppers pay, fully anonymized, and trade tips on the community board.
- **Spending analytics** — weekly spend trends with automatic high/low flags.
- **Per-item insights** — lowest, average, and highest price for every item you've bought.
- **Printable & shareable shopping lists** — clean lists grouped by store, category, or A–Z.
- **Search & sort across everything** — find any item, store, or receipt instantly.
- **Total privacy** — your receipts and prices stay private to your account, always.
- **One account, every device** — pick up where you left off on web, iOS, or Android.
- **All future updates included** — every new feature we ship, at no extra cost, forever.

No trial. No plan. No card. If you'd like to support development, there's an optional donation link — it unlocks nothing, because there's nothing left to unlock.
