

Receipt Tracker — How-to Guide

Scan receipts, track prices over time, and let your shopping list build itself. This guide walks through every part of Receipt Tracker with screenshots from the app.

1. Signing in

Receipt Tracker keeps each person's data private, so you start by signing in. Your receipts, stores, and prices are only ever visible to your own account.

A screenshot of the Receipt Tracker app's sign-in screen. The screen has a light purple background. At the top, there is a purple square icon with a white receipt symbol. Below the icon, the text "Welcome back" is displayed in bold, followed by "Sign in to your Receipt Tracker" in a smaller font. There are two input fields: one for "Email" with the placeholder text "you@example.com" and one for "Password" with the placeholder text "Enter password". Below these fields is a purple button with the text "Sign in". At the bottom, there is a link that says "Don't have an account? Sign up".

Welcome back
Sign in to your Receipt Tracker

Email

Enter password

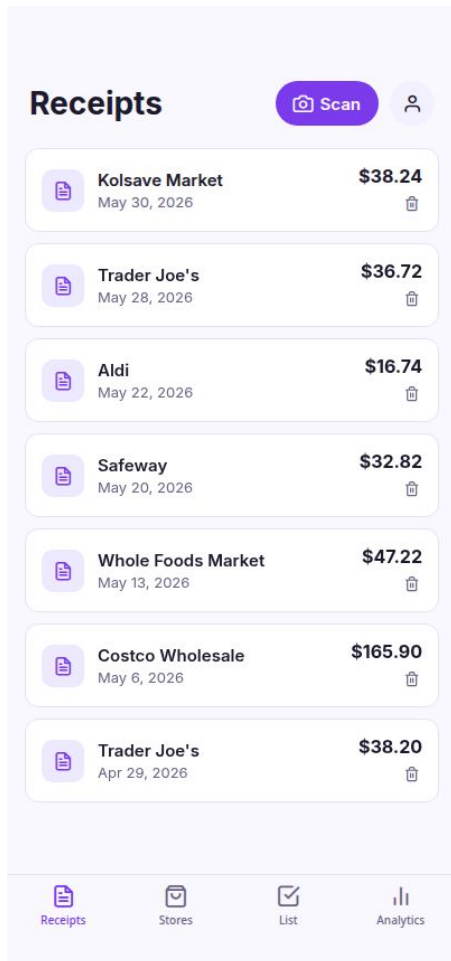

Sign in

Don't have an account? [Sign up](#)

- Enter your email and password, then tap Sign in.
- New here? Tap Sign up to create an account in a few seconds.
- You can sign out any time from the Account screen to switch accounts.

2. Your receipts

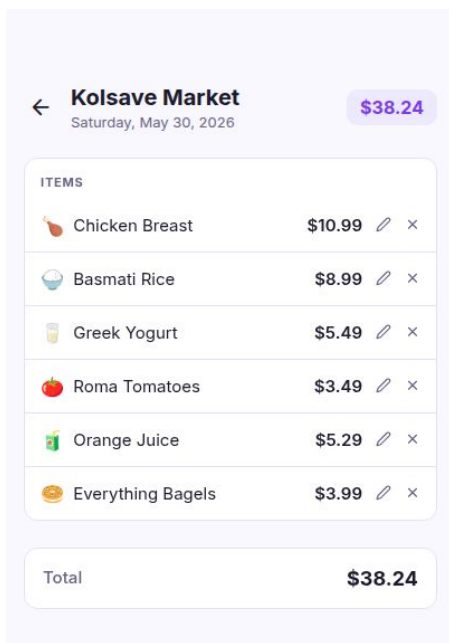

The Receipts tab is your home base — every receipt you scan or enter shows up here, newest first, with the store and total.

- Tap any receipt to open it and see the individual line items.
- The total on the right is calculated from the items on that receipt.
- Use the trash icon to remove a receipt you no longer need.

3. Receipt details

Open a receipt to review what was bought. This is where you fix anything the scanner misread.

Tap the pencil on a line to edit its name or price.

- Tap the × to delete a single item from the receipt.
- Each item carries an emoji and feeds your price history automatically.

4. Adding a receipt

Tap Scan (or Add Receipt) to capture a new purchase. AI reads the store, items, and prices for you.

×

Add Receipt

Upload a receipt

AI extracts the store, items, and prices automatically

Choose Photo

Upload PDF

PDFs work best for online order confirmations

Enter Manually Log Items

- Choose Photo to snap or upload a paper receipt — the AI extracts everything.
- Upload PDF works best for online order confirmations.
- Prefer to type? Use Enter Manually for a full receipt or Log Items for a quick list.

5. Review & save a scan

After the AI reads a photo or PDF, you land on the Review screen to confirm everything before it's saved. Anything the AI wasn't sure about is highlighted in amber.

Review Receipt

AI flagged 2 unclear fields — highlighted below

RECEIPT DETAILS

Store

Trader Joe's

Date

2026-05-28

Total

36.72

ITEMS (6)

Bananas

Check the store, date, and total at the top, then fix any highlighted fields.

- Edit item names, prices, and quantities; remove a line with the trash icon or add one with Add Item.
- Tap Confirm & Save to file the receipt and update your prices and shopping list.

6. Enter a receipt manually

No photo? Choose Enter Manually to type a full receipt yourself — handy for cash purchases or older receipts.

The screenshot shows a mobile app interface for manually entering a receipt. At the top, there's a header with a close button (X), the title 'Enter Manually', and a 'Save' button. Below the header, the form is divided into three main sections: 'STORE', 'RECEIPT', and 'ITEMS'. The 'STORE' section includes fields for 'Store Name *' (with a placeholder 'e.g. Whole Foods'), 'Address' (with a placeholder '123 Main St, City'), 'Phone' (with a placeholder '555-0100'), and 'Open Times' (with a placeholder 'Mon-Fri 9am-9pm'). The 'RECEIPT' section includes fields for 'Date *' (with a placeholder '2026-05-31'), 'Time' (with a placeholder '20:14'), 'Total Before Tax' (with a placeholder '0.00'), and 'Total After Tax *' (with a placeholder '0.00'). There is also a 'Notes' field with a placeholder 'Any additional notes...'. The 'ITEMS' section is a table with columns 'NAME', 'PRICE', and 'QTY'. It currently has one row with 'Item 1' in the 'NAME' column. Below the table is a dashed box containing a '+ Add Item' button.

STORE		
Store Name *		
e.g. Whole Foods		
Address		
123 Main St, City		
Phone	Open Times	
555-0100	Mon-Fri 9am-9pm	

RECEIPT	
Date *	Time
2026-05-31	20:14
Total Before Tax	Total After Tax *
0.00	0.00
Notes	
Any additional notes...	

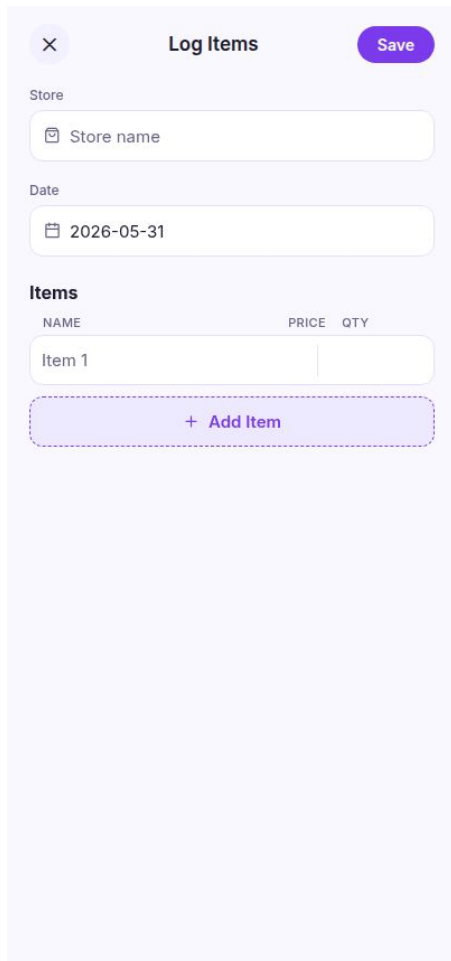

ITEMS		
NAME	PRICE	QTY
Item 1		

+ Add Item

- Fill in the store details and the receipt date, time, and totals.
- Add each item with its name, price, and quantity using Add Item.
- Tap Save to file it just like a scanned receipt.

7. Quickly log items

Log Items is the fastest way to jot down a few things — just a store, a date, and a short list. The total adds itself up as you go.

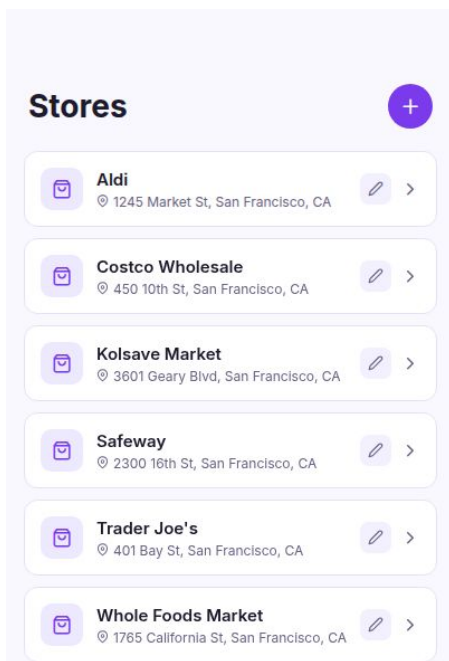

The screenshot shows the 'Log Items' screen. At the top, there is a close button (X) and a 'Save' button. Below the title, there is a 'Store' section with a dropdown menu labeled 'Store name'. Underneath is a 'Date' section with a date picker showing '2026-05-31'. The main section is titled 'Items' and contains a table with columns 'NAME', 'PRICE', and 'QTY'. The first row has 'Item 1' in the 'NAME' column. Below the table is a dashed border box containing a '+ Add Item' button.

- Start typing a store name and pick from the suggestions, or enter a new one.
- Add each item with its price and quantity; the running total updates live.
- Tap Save to turn the list into a receipt.

8. Stores

The Stores tab keeps the places you shop, along with delivery fees and minimum-order details.

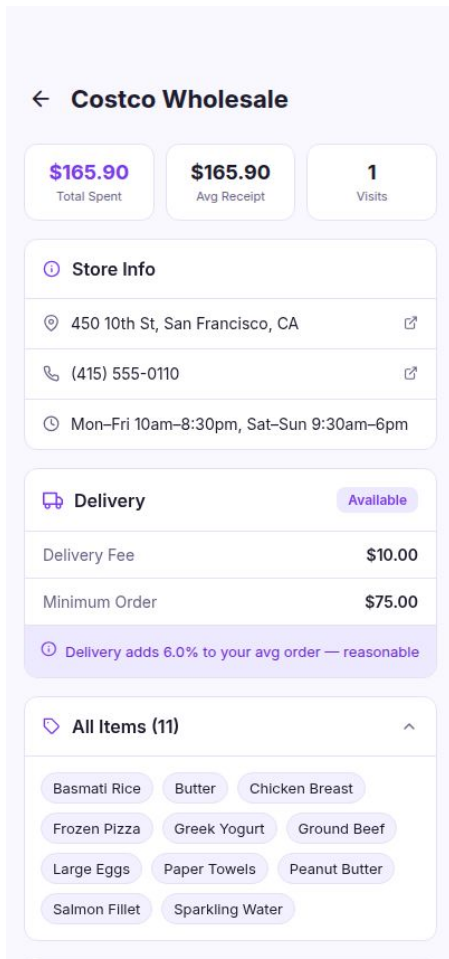

The screenshot shows the 'Stores' screen. At the top, there is a title 'Stores' and a purple circular button with a white plus sign. Below the title, there is a list of stores. Each store entry consists of a purple square icon with a white shopping bag, the store name, the address, a purple circular button with a white pencil icon, and a right arrow. The stores listed are: Aldi (1245 Market St, San Francisco, CA), Costco Wholesale (450 10th St, San Francisco, CA), Kolsave Market (3601 Geary Blvd, San Francisco, CA), Safeway (2300 16th St, San Francisco, CA), Trader Joe's (401 Bay St, San Francisco, CA), and Whole Foods Market (1765 California St, San Francisco, CA).

Tap + to add a store, or the pencil to edit one.

- Record delivery fee and minimum order to power the cost-benefit analysis.
- Tap a store card to open its detail screen.

9. Store cost-benefit

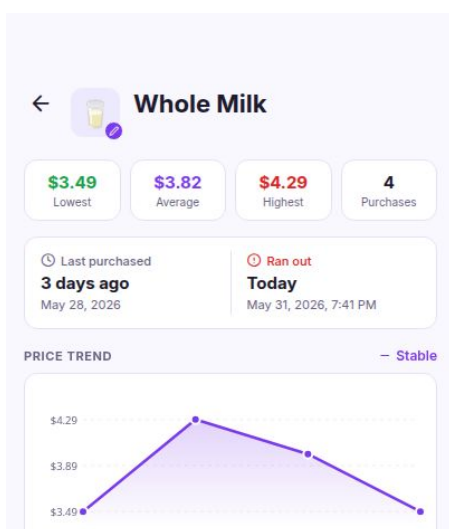

Each store's detail screen shows how much you spend there and whether delivery is worth it.

- See total spent, average receipt, and number of visits at a glance.
- The delivery box tells you what percentage the fee adds to a typical order.
- Browse every item you've ever bought at that store.

10. Item price history

Tap any item to track its price over time and see which store gave you the best deal.

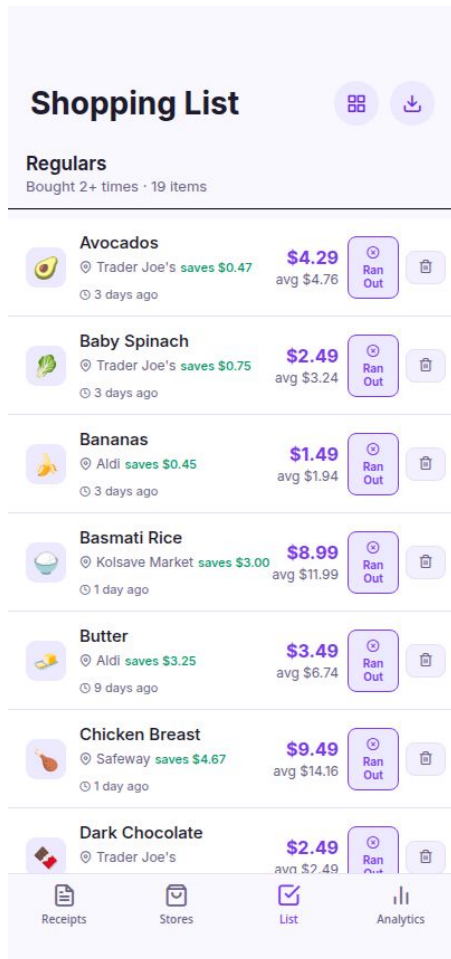

Lowest, average, and highest prices are summarized up top.

- The price trend chart plots every purchase you've logged.
- Tap the emoji to change it, or use Delete Item to remove it everywhere.

11. Shopping list

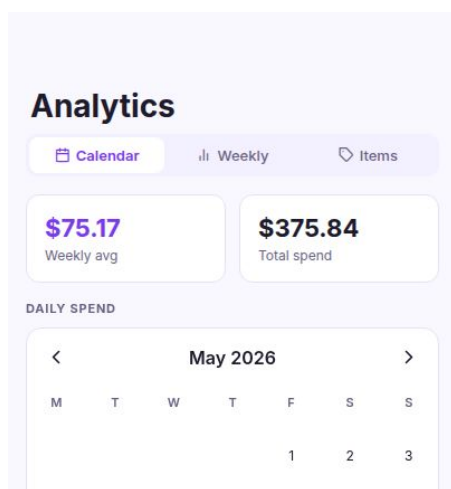

Your list builds itself from what you buy. Regulars are things you've purchased 2+ times; One-offs are the rest.

- Each item shows its lowest price, the best store, and how much you save.
- Mark something Ran Out to bump it back to the top of your list.
- Use the download button in the header to export a printable PDF grouped by store.

12. Spending analytics

The Analytics tab turns your receipts into spending insights so you can spot trends.

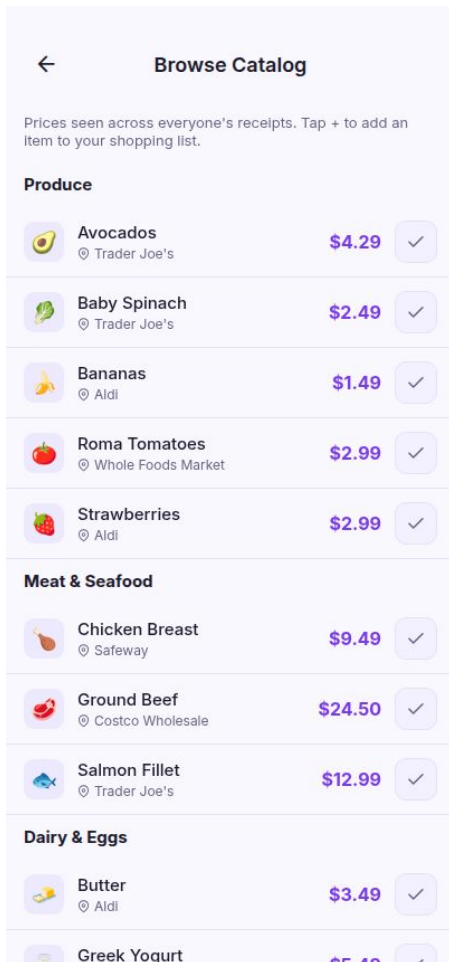

The calendar heatmap shades each day by how much you spent.

- Switch to Weekly to see spend per week with high/low flags.
- The Items view breaks down price history item by item.

13. Browse catalog

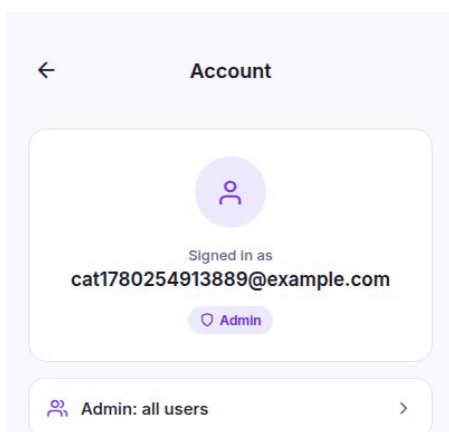

Open Browse Catalog from the Shopping List header to see prices seen across everyone's receipts, grouped by category.

- Tap the + (check) button to add any item to your own shopping list.
- Items already on your list appear checked.
- Prices reflect the most recent sighting across all shoppers — no names attached.

14. Your account

The Account screen shows who you're signed in as and lets you sign out. Admins see extra tools here.

Confirm the email tied to your data.

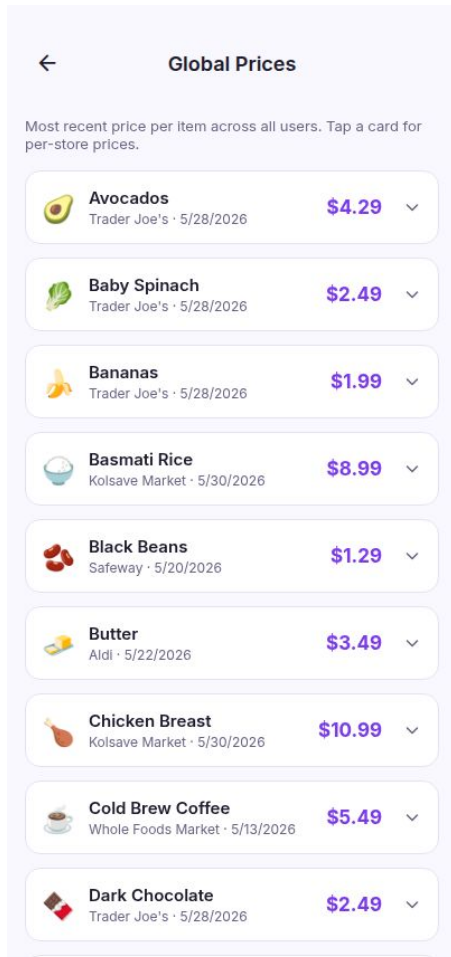

- Sign out to switch accounts — your data stays private to you.
- Admin tools, when available, appear as rows above Sign out.

Admin only

These tools appear only for the account designated as admin.

15. Global prices

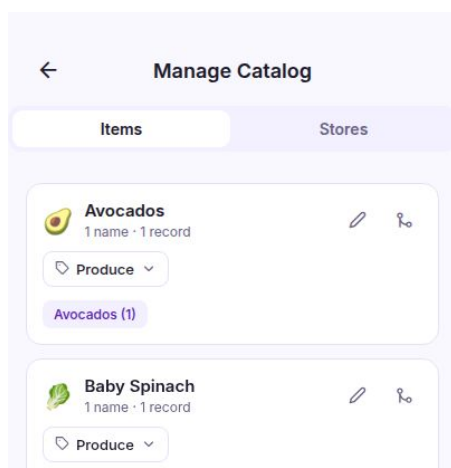

Admins get a read-only, cross-user view of the most recent price for every item — overall and per store.

- Tap a card to expand per-store prices, with the lowest highlighted.
- Data is aggregated across all users without exposing who bought what.
- Use it to keep the shared catalog's prices realistic.

16. Manage catalog

The catalog tool lets admins tidy up spelling variants of item and store names into clean, canonical entries.

Merge, rename, or split entries from the Items and Stores tabs.

- Auto-suggested merges surface near-duplicate names for one-tap cleanup.
- This only touches the shared catalog — it never edits anyone's private rows.

Generated for Receipt Tracker. Screenshots reflect the live app with demo data.
