

TimetoPay — How-to Guide

Scan receipts, track prices over time, and let your shopping list build itself. This guide walks through every part of TimetoPay with screenshots from the app.

1. Signing in

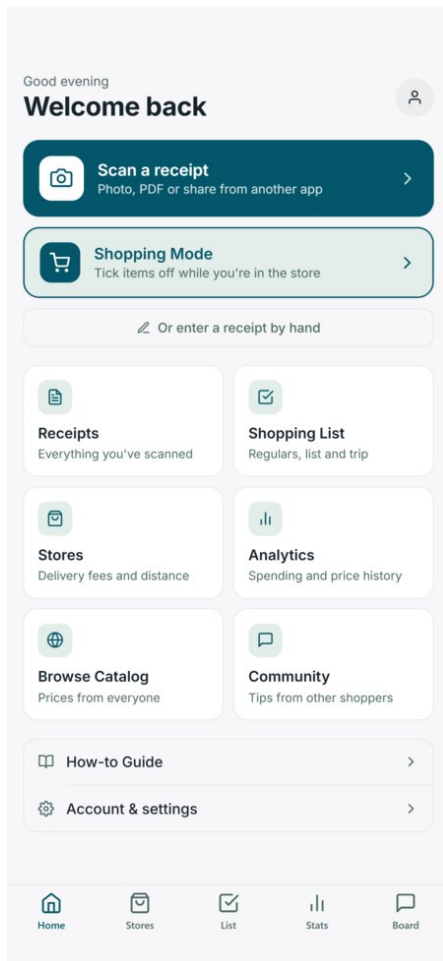

TimetoPay keeps each person's data private, so you start by signing in. Your receipts, stores, and prices are only ever visible to your own account.

A screenshot of the TimetoPay mobile app's sign-in screen. At the top, there is a teal icon of a receipt. Below it, the text "Welcome back" is displayed in bold, followed by "Sign in to your TimetoPay account". There are two input fields: "Email" with the text "support@fivetoninesolutions.com" and "Password" with the placeholder "Enter password" and an eye icon. A link "Forgot password?" is located below the password field. A teal "Sign in" button is positioned below the password field. Below this, there is a horizontal line with the word "or" in the center. Underneath the line is a white button with the Google logo and the text "Sign in with Google". At the bottom, there is a link "Don't have an account? Sign up" and a button with a download icon and the text "Add to Home Screen".

- Enter your email and password, then tap Sign in.
- New here? Tap Sign up to create an account in a few seconds.
- You can sign out any time from the Account screen to switch accounts.

2. The Home screen

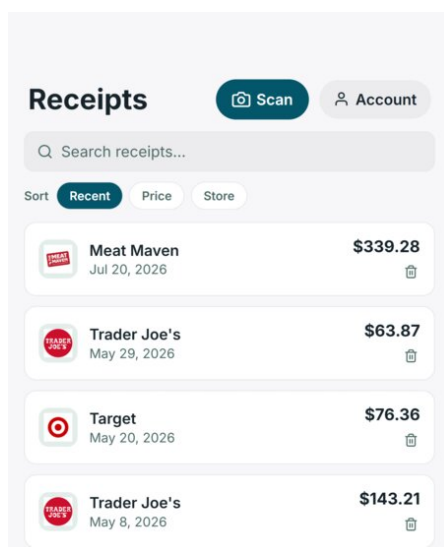

TimetoPay opens on a hub, not a list. Scan a receipt in one tap, or jump straight to any other part of the app.

- Tap Scan a receipt (or Shopping Mode, if it's showing) to jump straight into either.
- The six tiles below — Receipts, Shopping List, Stores, Analytics, Browse Catalog, and Community — take you anywhere else in one tap.
- The tab bar at the bottom always has Home, Stores, List, Stats, and Board; Receipts and Account live one tap from Home.

3. Your receipts

Every receipt you scan or enter shows up on the Receipts screen, newest first, with the store and total.

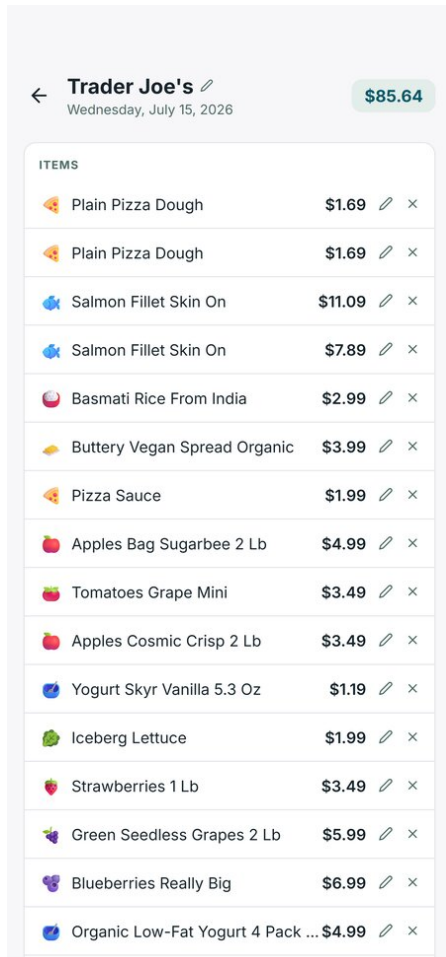

Tap any receipt to open it and see the individual line items.

- The total on the right is calculated from the items on that receipt.
- Use the search box and Sort control at the top to find or reorder your receipts.
- Use the trash icon to remove a receipt you no longer need.

4. Receipt details

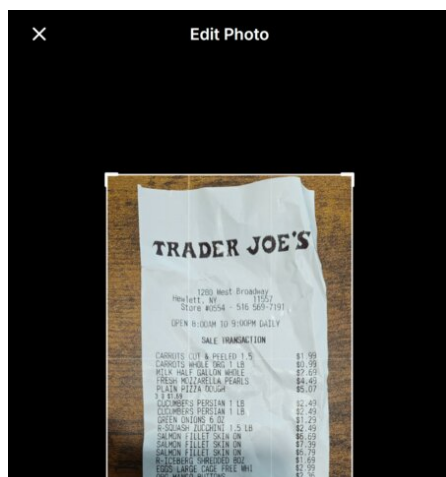

Open a receipt to review what was bought. This is where you fix anything the scanner misread.

- Tap the pencil on a line to edit its name or price.
- Tap the × to delete a single item from the receipt.
- Each item carries an emoji and feeds your price history automatically.

5. Adding a receipt

Tap Scan (or Add Receipt) to capture a new purchase. AI reads the store, items, and prices for you.

Choose Photo to snap or upload a paper receipt — the AI extracts everything.

- Upload PDF works best for online order confirmations.
- Prefer to type? Use Enter Manually for a full receipt or Log Items for a quick list.

6. Review & save a scan

After the AI reads a photo or PDF, you land on the Review screen to confirm everything before it's saved. Anything the AI wasn't sure about is highlighted in amber.

The screenshot shows a mobile app interface for reviewing a receipt. At the top, there's a close button (X) and the title 'Review Receipt'. Below this, a green status bar says 'All fields read clearly' next to a small thumbnail of the scanned receipt. The main section is titled 'RECEIPT DETAILS' and contains several input fields: 'Store' (Trader Joe's), 'Date' (2026-05-29), 'Total' (63.87), 'Delivery / service fee (optional)' (0), 'Tax (optional)' (0), and 'Discount (optional)' (0). Below this is the 'ITEMS (16)' section, which lists two items: 'Carrots Cut & Peeled 1.5' and 'Carrots Whole Organic 1 Lb'. Each item has a unit price and a quantity field. At the bottom, there are two buttons: 'Save & Next' (with a plus icon) and 'Save & Close' (with a checkmark icon).

- Check the store, date, and total at the top, then fix any highlighted fields.
- Edit item names, prices, and quantities; remove a line with the trash icon or add one with Add Item.
- Tap Confirm & Save to file the receipt and update your prices and shopping list.

7. Enter a receipt manually

No photo? Choose Enter Manually to type a full receipt yourself — handy for cash purchases or older receipts.

The 'Enter Manually' form is divided into three main sections: STORE, RECEIPT, and ITEMS. The STORE section includes fields for Store Name (with an example 'e.g. Whole Foods'), Address (with an example '123 Main St, City'), Phone (with an example '555-0100'), and Open Times (with an example 'Mon-Fri 9am-9pm'). The RECEIPT section includes fields for Date (with an example '2026-05-31'), Time (with an example '20:14'), Total Before Tax (with an example '0.00'), and Total After Tax (with an example '0.00'). There is also a Notes field with the placeholder text 'Any additional notes...'. The ITEMS section is a table with columns for NAME, PRICE, and QTY, containing one row with 'Item 1'. Below the table is a '+ Add Item' button. A 'Save' button is located at the top right of the form.

STORE		
Store Name *		
e.g. Whole Foods		
Address		
123 Main St, City		
Phone	Open Times	
555-0100	Mon-Fri 9am-9pm	

RECEIPT	
Date *	Time
2026-05-31	20:14
Total Before Tax	Total After Tax *
0.00	0.00
Notes	
Any additional notes...	

ITEMS		
NAME	PRICE	QTY
Item 1		
+ Add Item		

- Fill in the store details and the receipt date, time, and totals.
- Add each item with its name, price, and quantity using Add Item.
- Tap Save to file it just like a scanned receipt.

8. Quickly log items

Log Items is the fastest way to jot down a few things — just a store, a date, and a short list. The total adds itself up as you go.

The 'Log Items' form is simpler than the 'Enter Manually' form. It has a 'Store' section with a 'Store name' field, a 'Date' section with a date field (showing '2026-05-31'), and an 'Items' section which is a table with columns for NAME, PRICE, and QTY. The table contains one row with 'Item 1'. Below the table is a '+ Add Item' button. A 'Save' button is located at the top right of the form.

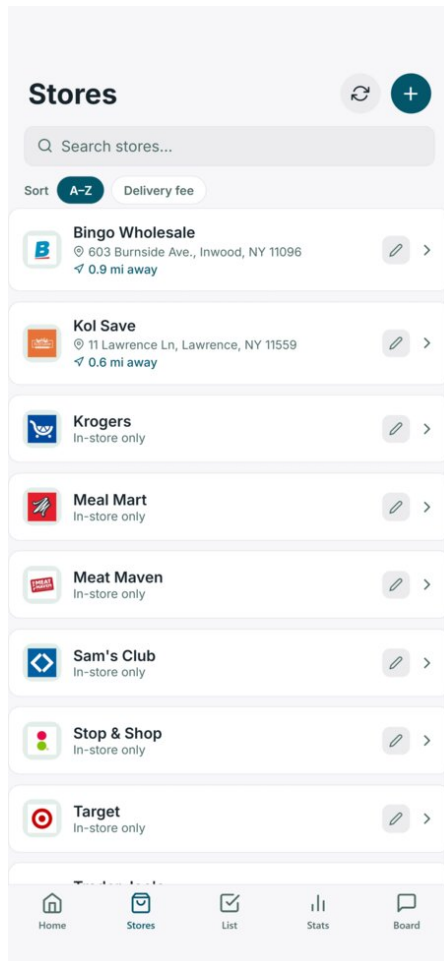

Log Items		
Store		
Store name		
Date		
2026-05-31		
Items		
NAME	PRICE	QTY
Item 1		
+ Add Item		

Start typing a store name and pick from the suggestions, or enter a new one.

- Add each item with its price and quantity; the running total updates live.
- Tap Save to turn the list into a receipt.

9. Stores

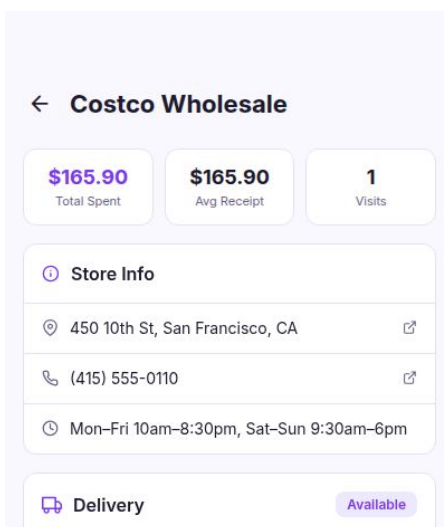

The Stores tab keeps the places you shop, along with delivery fees and minimum-order details.

- Tap + to add a store, or the pencil to edit one.
- Record delivery fee and minimum order to power the cost-benefit analysis.
- Tap a store card to open its detail screen.

10. Store cost-benefit

Each store's detail screen shows how much you spend there and whether delivery is worth it.

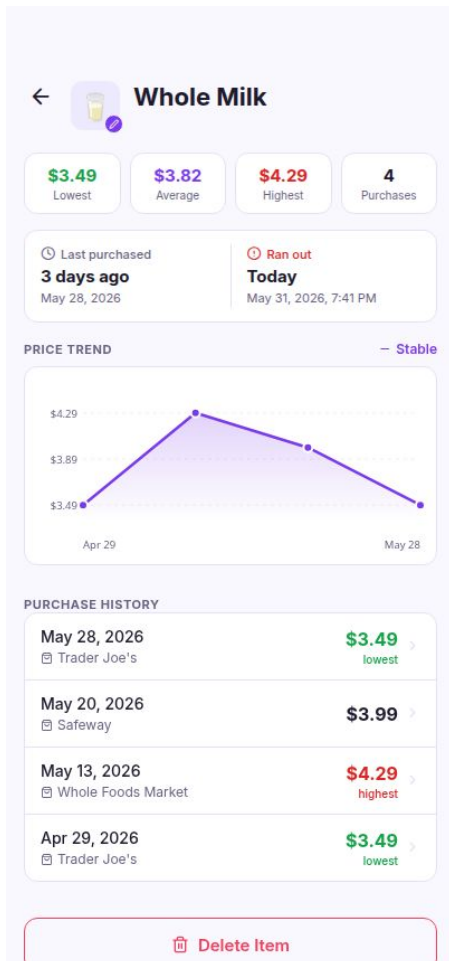

See total spent, average receipt, and number of visits at a glance.

- The delivery box tells you what percentage the fee adds to a typical order.
- Browse every item you've ever bought at that store.

11. Item price history

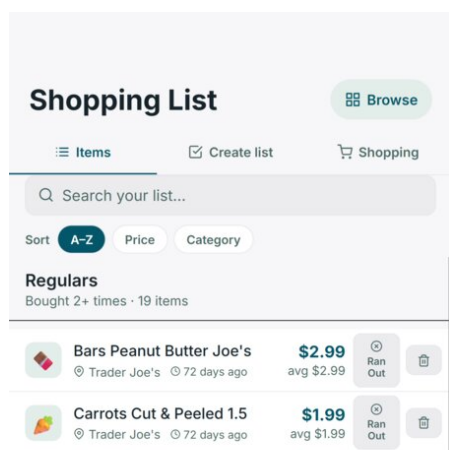

Tap any item to track its price over time and see which store gave you the best deal.

- Lowest, average, and highest prices are summarized up top.
- The price trend chart plots every purchase you've logged.
- Tap the emoji to change it, or use Delete Item to remove it everywhere.

12. Shopping list

The Shopping List screen has three sub-tabs: Items (your list), Create list (what to bring today), and Shopping (checking things off in the store). Your list builds itself from what you buy — Regulars are things you've purchased 2+ times; One-offs are the rest.

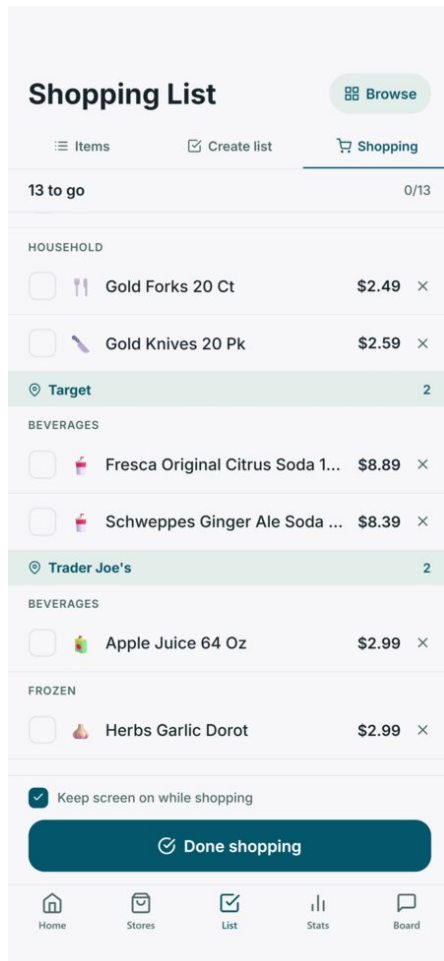

In Items, each entry shows its lowest price, the best store, and how much you save. Mark something Ran Out to bump it back to the top.

- In Create list, pick which items to bring, merge near-duplicate names, and add anything one-off with the custom-item field.
- Tap Share or PDF in Create list to export it, grouped by store, category, or A–Z.

13. Shopping Mode

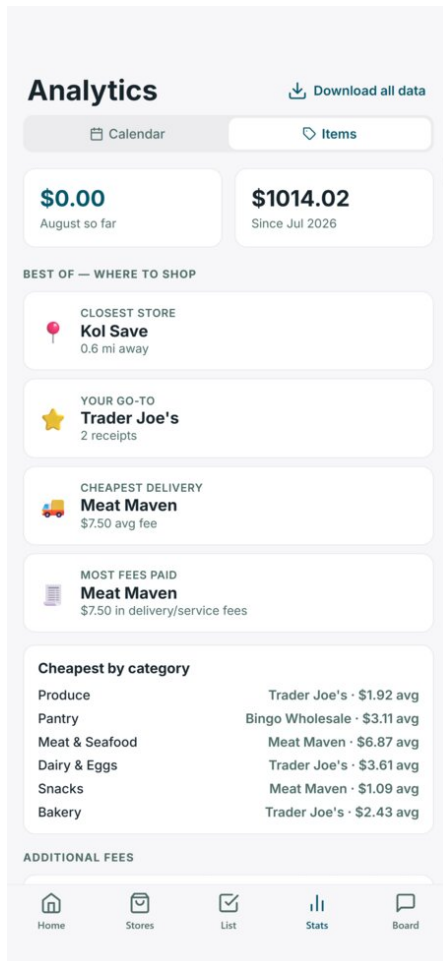

Switch to the Shopping sub-tab while you're actually in the store. It groups your list by store with big checkboxes, a running total, and nothing else to distract you.

- Tick items off as they go in your cart — the total updates as you go.
- Turn on Keep screen on so the display doesn't lock mid-trip.
- Tap Done shopping when you're finished. Anything still ticked is no longer "ran out," and this is the only thing that starts the reminder clock if you don't log a receipt afterward.

14. Spending analytics

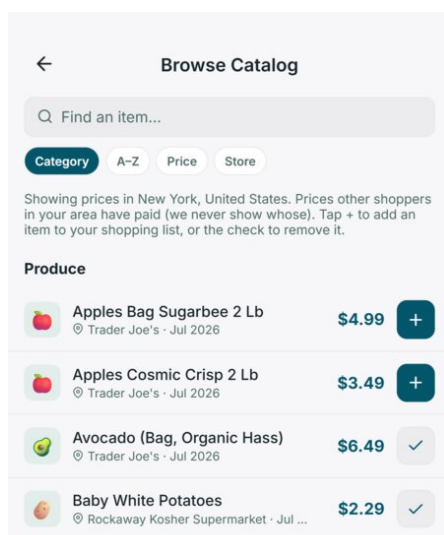

The Analytics tab turns your receipts into spending insights so you can spot trends. It has two sub-tabs: Calendar and Items.

- Calendar shades each day by how much you spent, and shows a recommended weekly budget based on your recent average.
- Items breaks down price history item by item, plus "Best of" cards for your go-to store, cheapest delivery, and cheapest store per category.
- Tap a day or an item to see the detail behind the number.

15. Browse catalog

Open Browse Catalog from the Shopping List header to see typical prices for items that multiple shoppers have bought, grouped by category.

Tap the + (check) button to add any item to your own shopping list.

- Items already on your list appear checked.
- You only ever see prices for items several shoppers have bought — never who bought them.

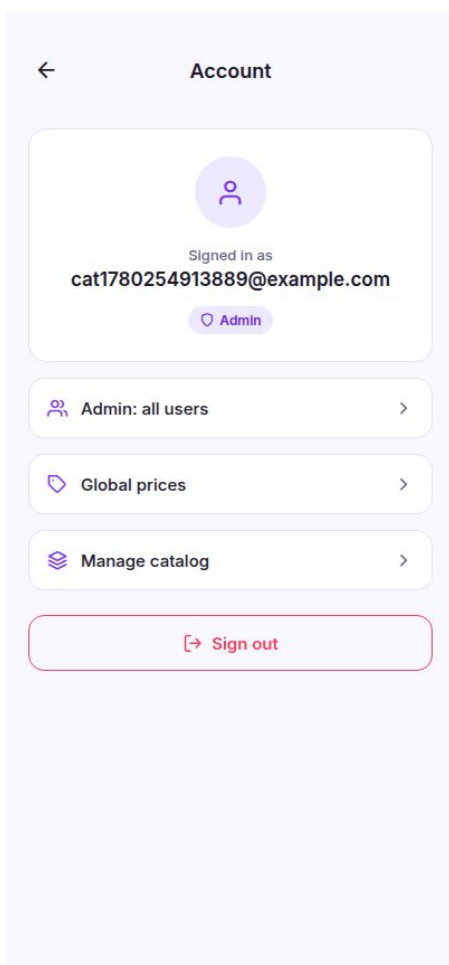

16. Community Board

The Board is where shoppers post tips, deals, and recipes. Posting takes a couple of receipts uploaded first, and every post is reviewed before it appears.

- Tap Community from the Home hub to read posts, or write your own — new posts go to a moderator first.
- Tap Agree or Thanks on a post, or add a reply.
- If something breaks the rules, tap the "i" menu and choose Report. To stop seeing someone entirely, choose Block instead — it takes effect immediately, and you can undo it from Account !' Blocked accounts.

17. Your account

The Account screen shows who you're signed in as, your region, and your notification and privacy settings.

- Confirm the email tied to your data, and set your country/state so catalog prices match your area.
- Add a home address (optional) to see distance to each store — everything you scan stays private to your account either way.

Sign out here to switch accounts.
